

# Burpsuite 插件之 Active Scan++使用方法

BY:裁决

## Active Scan++介绍

ActiveScan ++扩展了 Burp Suite 的主动和被动扫描功能。

项目地址: <https://github.com/albinowax/ActiveScanPlusPlus>

## Active Scan++安装

需要 jython-standalone-2.5.jar 环境【参考 jython 环境安装】

The screenshot shows the Burp Suite interface with the 'Extender' tab selected. The 'BApp Store' tab is also visible, showing a list of extensions. The 'Active Scan++' extension is highlighted in the list. The details for 'Active Scan++' are shown on the right, including its description, features, and an 'Install' button.

**Burp Suite Interface:**

- Menu: Burp Intruder Repeater Window Logger++ Help
- Tab: Extender (selected)
- Sub-tab: BApp Store (selected)

**BApp Store List:**

**Active Scan++ Details:**

- ActiveScan++** extends Burp Suite's active and passive scanning capabilities.
- Potential host header attacks (password reset poisoning, cache poisoning)
- Edge side includes
- XML input handling
- Suspicious input transformation (eg 7\*7 => '49', '\x41\x41 => 'AA')
- Passive-scanner issues that only occur during fuzzing (install the 'Er...

It also adds checks for the following issues:

- Blind code injection via expression language, Ruby's open() and Perl
- CVE-2014-6271/CVE-2014-6278 'shellshock' and CVE-2015-2080, C...

It also provides insertion points for HTTP basic authentication.

To invoke these checks, just run a normal active scan.

The host header checks tamper with the host header, which may result in a shared hosting environment.

This extension requires Burp Suite Professional version 1.6 or later and J...
